

Nutrient Budgets – Version 5.4.4

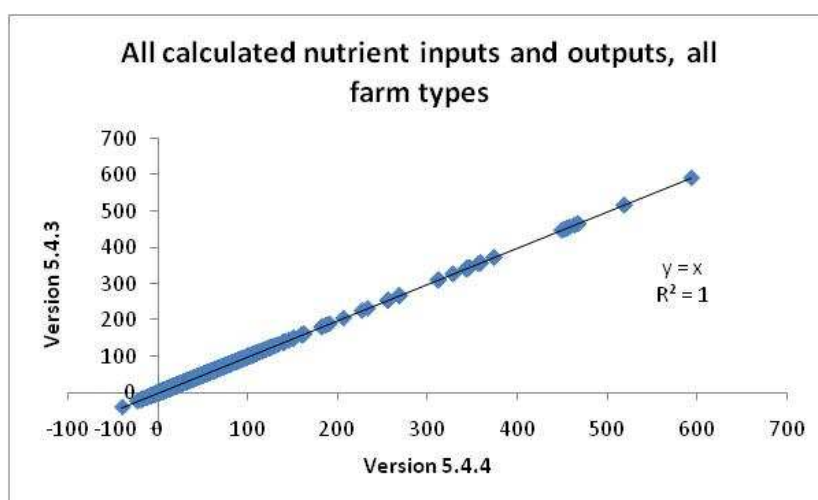

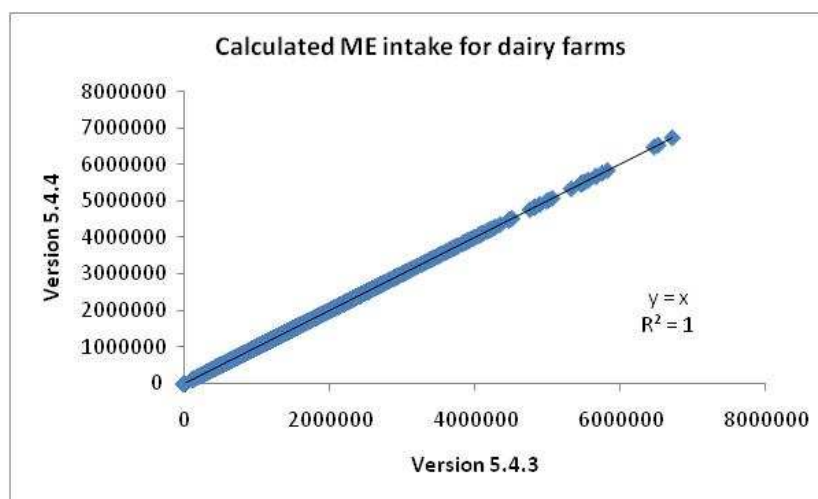

Notes on new release, June 2010

Version 5.4.4 replaces version 5.4.3

There are no significant changes to the model, other than a few minor bug fixes, mainly around reporting.

The reason for the re-issue is that the expiry date on version 5.4.3 had been reached.

To confirm that there will have been no significant changes to calculated results we compared results between versions 5.4.3 and 5.4.4 for a large number of test files. This confirmed no changes in results, with slopes of 1 and intercepts of zero for all comparisons that we made, e.g.:
